DIGITAL FORENSICS

DIGITAL FORENSICS

In today's technological age, every facet of our culture involves electronic devices and computer systems. Accessing deleted, hidden, or lost data on these devices sometimes requires a trained expert with specialized software. INA has the personnel and resources to handle all your digital forensic needs.

INA has been conducting digital forensic investigations for nearly 20 years. In 2017, our digital forensic laboratory was relocated to a new, custom built, state of the art facility. Our team of trained investigators adheres to industry best practices and strict evidentiary recovery standards. They are qualified experts capable of accessing data on computer networks, mobile devices, thumb drives, or any other device capable of storing electronic data.

Our applications, including the industry leader in cell phone analytics Cellebrite™, allows INA to conduct investigations involving employee misconduct, intellectual property theft, and data breach response.

Investigators of digital evidence.

DIGITAL FORENSIC APPLICATIONS

We will gather, verify, or discover information that may not be otherwise obtained. What we do requires specialized software and techniques applied by trained forensic investigators. Digital forensics may be used to develop information to address the following types of issues:

- Employee misconduct
- Data recovery (accidental and intentional)
- Fraud and other criminal activity
- Intellectual property theft
- Conflicts of interest
- Violations of non-compete agreements
- Litigation support
- Electronic discovery
- Suspected child pornography
- Data breaches

Who We Are

We are **Information Network Associates, Inc. (INA)**, an international risk management, security consulting, and private investigative agency. Founded in 1982 by a former FBI agent, our staff of former law enforcement professionals work with our clients to manage current and emerging threats.

Integrity, discretion, confidentiality, and quality comprise the cornerstones of our business. We believe in long term client relationships based on trust, respect, and mutual benefit. We hold our employees to the highest standards of ethical and legal conduct.

We have earned a reputation as professional problem solvers. INA delivers solutions to our clients in order to navigate dangerous and uncertain times. We are guided by internationally recognized Enterprise Security Risk Management principles.

20% of Global Fortune 100 companies enlist our services.
